Experience

SENIOR PROGRAM MANAGER | RED HAT, INC. | 2017 - 2023

- Managed hardware, software, and cloud certification programs with products including Red Hat Enterprise Linux, OpenStack, and OpenShift.
- Maintained business reviews with analysis of certification programs, including impact of global business unit goals.
- Prioritized the onboarding of new products with certification to reduce friction in development of build-with partners and go-to-market strategies.
- Use of agile methodologies to manage multiple scrums with competing resources and timelines.
- Developed and led the transition of disparate support processes and environments to a unified automated analysis platform, reducing global security and operational risk.

SENIOR SOFTWARE ENGINEER | RED HAT, INC. | 2015 - 2017

- Developed and managed tools for use by global support teams to provide predictive analytics and diagnostics of strategic customer systems.
- Engagement with all levels of Red Hat leadership, including marketing and product management, to ensure the smooth integration of tools into product lines.

SENIOR TECHNICAL ACCOUNT MANAGER | RED HAT, INC. | 2012 - 2015

- Worked with Red Hat's most strategic customers and federal agencies ensure their success with the Red Hat platform and storage products.
- Proactive engagement helping customers leverage their existing infrastructures, especially with the Red Hat Storage product.
- Developed and deployed multiple strategies for increasing customer deployments on cloud and distributed computing systems.

SOFTWARE ENGINEER | HOMEGAUGE | 2006 - 2012

- Developed web applications in Java and PHP running on Apache and Resin environments on Red Hat Enterprise Linux 5 and 6 servers.
- Data management through MySQL databases.
- Administration of RHEL physical and virtual servers providing email and website hosting for over six hundred domains.
